APRIL- JUNE, 2018

PDMS

This course is designed to equip participants with knowledge on the use of various tools and components to execute design and modelling of equipment & piping layouts using the AVEVA E3D solution including an overview and introduction to the AVEVA E3D application. Lonadek held her PDMS training on 16th to 20th of April, 2018, which was attended by many participants who had an engaging and learning time with us.

AutoCAD 2D and 3D Training

As part of our Human Development Programs, our AutoCAD 2D & 3D Training took place from the 4th to 15th June, 2018. This course provided participants with a comprehensive understanding of the application of state-of-the-art 2D & 3D modelling Engineering Drafting application for the issuance of quality deliverables in the Design of Oil and Gas facilities. The participants were given the opportunity to develop at least one project specific deliverable during the Training Programme.

DRONE WORKSHOP

The Drone Technology Workshop was a one day event which hosted Co-founder of Baltimore-based Global Air Media, Mr. Eno Umoh, and his team. The team facilitated hands-on workshop designed to stimulate the interest of the participating students in math and science, as well as careers in the Science, Technology, Engineering and Mathematics (STEM) fields. The training was held at the Cedar STEM & Entrepreneurship Hub on Monday 4th June, 2018 and paraded a team of three drone experts. The participants were 30 students from different schools in Lagos state.

The students were coached on the basics of building a drone from the scratch, and were able to acquaint themselves with the requisite skills for piloting and landing an unmanned aerial vehicle (UAV) also known as drones. The workshop ended with a closing remark by Mr. Ibrahim Aliyu, a representative of the U.S Consulate, and was followed by a photo session.

ENTREPRENEURSHIP TRAINING

Our Entrepreneurship class held from the 11th to 13th of June, 2018. We had participants from Marine platform Limited, who had an impacting period during the training. The training introduced the concepts of enterprise, innovation, small business and their inter-relationships, it also provided a guide to the key facts, ideas, theories and thinking on enterprise and innovation, and looked at their relationship with small businesses, given projects and assignments for real applications.

The training taught methods that could be used to promote businesses and source for finance. The participants were involved in group discussions, case studies analysis and professed solutions to various challenges in the sectors. At the end of the class, the participants were

INSTRUMENTATION, AUTOMATION AND PROCESS CONTROL

This course provided coherent, hands-on practical training for engineers, operators and technicians in the instrumentation and control units. An edition of this training; Instrumentation, Automation and Process Control took place from the 19th to 23rd of June, 2018 at our Cedar Centre. The training programme provided the participants with the requisite knowledge, and also assisted participants to effectively and efficiently monitor, control and process variables such as Level, Pressure, Temperature, Humidity, Flow, pH, Force and Speed etc. in a production environment.

26TH CAREER COUNSELLING, INDUSTRY AWARENESS AND YOUTH EMPOWERMENT WORKSHOP

The 26th Career Counselling, Industry Awareness & Youth Empowerment Workshop organised by the Vision 2020 YERI team was held on Thursday, 17th May 2018 at the Yaba College of Technology.

This year, the event hosted youth, particularly SSS 1 – 3 students, University and Polytechnic undergraduates as well as NYSC Corp members to a one-day workshop, where industry professionals delivered presentations in line with the theme; Transforming Nigeria through STEM Education. The presentations included 'Importance of STEM Education in Nigeria', 'Youth in Leadership & Entrepreneurship in STEM', and so on. The youth also learnt about scholarship opportunities available in the US to deserving students by Education USA, US Consulate.

GAS TRANSMISSION & DISTRIBUTION PIPING SYSTEM (ASME B31.8)

The importance of this training is underscored by the need for competent and proficient Piping Engineers in our Oil and Gas Industries in furtherance to the push for local content by the government, which makes it necessary for companies to train Nigerian Engineers.

Gas Transmission & Distribution Piping System (ASME B31.8) training program was held at our facility from the 19th to 23rd June, 2018. The participants were provided with an in-depth knowledge on the design, operation, maintenance and repair of NG transmission and distribution pipeline. The course focused on causes and modes of pipeline failure; considerations for pipe fabrication and material specifications; allowable stress limits for above the ground and buried piping; evaluation of pipeline defects; pipeline repair techniques and how the ASME B31.8 code requirements addresses these issues.

AACE - CERTIFICATION TRAINING

The Integrated Cost Engineering, Estimating, Planning & Scheduling (CEEPPS) program (An AACE Certification Prep Course) provided by Lonadek Nigeria Limited; is a five (5) day course designed to equip participants in the field of cost engineering, estimating, planning and scheduling.
